1 Accounting policies

Basis of preparation

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention, and in accordance with applicable accounting standards, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

Going concern

The directors believe that the company is well placed to manage its business risks successfully, despite the current uncertain economic outlook, and have reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. Thus, the directors continue to adopt the going concern basis of accounting in preparing the annual financial statements

Turnover

Turnover represents amounts chargeable in respect of the sale of services to customers. Revenue is recognised in the accounts on the date the sales invoice is issued. Turnover represents the value of services provided under contracts to the extent that there is a right to consideration and is recorded at the value of the consideration due. Where a contract has only partially been completed at the balance sheet date turnover represents the value of the service provided to date based on a proportion of the total expected consideration at completion. Where payments are received in advance of services provided, the amounts are recorded as deferred income and included as part of creditors due within one year.

Depreciation

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation, less any estimated residual value, over their expected useful economic life as follows

Asset class	Depreciation method and rate
Office equipment	25% straight line basis
Computer equipment	25% straight line basis

Foreign currency

Profit and loss account transactions in foreign currencies are translated into sterling at the exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into sterling at the closing rates at the balance sheet date and the exchange differences are included in the profit and loss account.
