Basis of preparation

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (Effective January 2015).

Going concern

As at the year end, the company's balance sheet shows net current liablities of £58,309 (2015: £56,772). Accordingly the directors have had to consider the basis upon which the accounts should be prepared and determine whether a going concern basis remains appropriate. The accounts have been prepared on a going concern basis as the directors continue to provide financial support when necessary to the company.

Turnover represents amounts chargeable, net of value added tax, in respect of the sale of goods and services to customers.

Deferred tax is measured at the rates that are expected to apply in the periods when the timing differences are expected to reverse, based on the tax rates and law enacted at the balance sheet date.

Hire purchase and leasing

Rentals payable under operating leases are charged in the profit and loss account on a straight line basis over the lease term.

Assets held under finance leases, which are leases where substantially all the risks and rewards of ownership of the asset have passed to the company, are capitalised in the balance sheet as tangible fixed assets and are depreciated over the shorter of the lease term and their useful lives. The capital elements of future obligations under the leases are included as liabilities in the balance sheet. The interest element of the rental obligation is charged to the profit and loss account over the period of the lease and represents a constant proportion of the balance of capital repayments outstanding.
