The company is entitled to exemption from audit under Section 477 of the Companies Act 2006 for the year ended 31 December 2019.

The members have not required the company to obtain an audit of its financial statements for the year ended 31 December 2019 in accordance with Section 476 of the Companies Act 2006.

The directors acknowledge their responsibilities for:

ensuring that the company keeps accounting records which comply with Sections 386 and 387 (a) of the Companies Act 2006 and

preparing financial statements which give a true and fair view of the state of affairs of the company as at the end of

each financial year and of its profit or loss for each financial year in accordance with the (b) requirements of Sections

394 and 395 and which otherwise comply with the requirements of the Companies Act 2006 relating to financial

statements, so far as applicable to the company.

The notes form part of these financial statements

Page 2

Balance Sheet - continued <u>31 December 2019</u>

The financial statements have been prepared and delivered in accordance with the provisions applicable to companies subject to the small companies regime.

In accordance with Section 444 of the Companies Act 2006, the Income Statement has not been delivered.

The financial statements were approved by the Board of Directors on 23 March 2020 and were signed on its behalf by:

C B Smith-Rewse - Director

The notes form part of these financial statements

Notes to the Financial Statements for the Year Ended 31 December 2019

1. **STATUTORY INFORMATION**

RSscan Lab. Ltd is a private company, limited by shares , registered in England and Wales. The company's

registered number and registered office address can be found on the Company Information page.

The presentation currency of the financial statements is the Pound Sterling (£).

2. ACCOUNTING POLICIES

Basis of preparing the financial statements

These financial statements have been prepared in accordance with Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" including the provisions of Section 1A "Small Entities" and the Companies Act 2006. The financial statements have been prepared under the historical cost convention.

Going Concern

Having reviewed the projected results and cash flow forecasts of the company the directors are confident that the

company will be able to meet its cash obligations in the foreseeable future. Whilst there is always considerable

uncertainty in predicting cash flows more than a few months into the future, the directors are confident that the

cash demands of the company will be satisfied, and it is therefore appropriate to prepare the financial statements

on the going concern basis.

Significant judgements and estimates

In the application of the Company's accounting policies, which are described below, the directors are required to

make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not

readily apparent from other sources. The estimates and associated assumptions are based on historical experience

and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimated and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates

are recognised in the period in which the estimate is revised if revision affects only that and future periods.

Critical Judgements in applying the company's accounting policies

The following are the critical judgements, including those involving estimations, that the directors have made in

the process of applying the company's accounting policies and that have the most significant effect on the

amounts recognised in the financial statements.

Depreciation of tangible fixed assets

Tangible fixed assets are recognised at cost and depreciated over the basis appropriate to charge to the profit and

loss account the economic consumption of those assets during the accounting period. The charge is calculated as

described below and is based on the director's knowledge of the reduction in the residual value of trading assets

on average over the investment cycle of each class of asst. The rates of depreciation are kept under review such

that assets are written down to residual value at the end of their economic lives.

Turnover

Turnover is measured at the fair value of the consideration received or receivable, excluding discounts, rebates,

value added tax and other sales taxes.

Goodwill

Goodwill of £25.000. being the amount paid in connection with the acquisition of a business

amortised evenly over its estimated useful life of five years.

Goodwill of £24,000, being the amount paid in connection with the acquisition of a business in 2007, was amortised evenly over its estimated usefgelife of five years. continued...

<u>Notes to the Financial Statements - continued</u> <u>for the Year Ended 31 December 2019</u>

2. ACCOUNTING POLICIES - continued

Intangible assets

Intangible assets are initially measured at cost. After initial recognition, intangible assets are measured at cost less

any accumulated amortisation and any accumulated impairment losses.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Improvements to property Plant and equipment Fixtures and fittings Computer equipment the remaining term of the lease
25% on reducing balance
25% on reducing balance
4 years straight line

Stocks

Stocks are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

Financial instruments

Debt instruments, such as loans and other accounts receivable and payable, are initially measured at present value

of the future payments and subsequently at amortised cost using the effective interest method. Debt instruments

that are payable or receivable within one year, typically trade payables or receivables, are measured, initially and

subsequently, at the undiscounted amount of the cash or other consideration, expected to be paid or received.

However if the arrangements of a short-term instrument constitute a financing transaction, such as the payment

of a trade debt deferred beyond normal business terms or financed at a rate of interest that is not a market rate,

or in case of an outright short-term loan not at market rate, the financial asset or liability is measured, initially and

subsequently, at the present value of the future payment discounted at a market rate of interest for a similar debt

instrument.

Financial assets that are measured at cost and amortised cost are assessed at the end of each reporting period for

objective evidence of impairment. If objective evidence of impairment is found, an impairment loss is recognised

in the Statement of Comprehensive Income.

For financial assets measured at amortised cost, the impairment loss is measured as the difference between an

asset's carrying amount and the present value of estimated cash flows discounted at the asset's original effective

interest rate. If a financial asset has a variable interest rate, the discount rate for measuring any impairment loss is

the current effective interest rate determined under the contract.

For financial assets measured at cost less impairment, the impairment loss is measured as the difference between

an asset's carrying amount and best estimate, which is an approximation of the amount that the company would

receive for the asset if it were to be sold at the balance sheet date.

Financial assets and liabilities are offset and the net amount reported in the Balance sheet when there is an

enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise

the asset and settle the liability simultaneously.

Taxation

Taxation for the year comprises current and deferred tax. Tax is recognised in the Income Statement, except to the

extent that it relates to items recognised in other comprehensive income or directly in equity.

Current or deferred taxation assets and liabilities are not discounted.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Page 5

<u>Notes to the Financial Statements - continued</u> <u>for the Year Ended 31 December 2019</u>

2. ACCOUNTING POLICIES - continued Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from

those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that

have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they

will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Research and development

Expenditure on research and development is written off in the year in which it is incurred.

Foreign currencies

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance

sheet date. Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date

of transaction. Exchange differences are taken into account in arriving at the operating result.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension

scheme are charged to profit or loss in the period to which they relate.

Impairment

At each reporting date, goodwill and other fixed assets, including tangible fixed assets and investments but

excluding investment properties, are assessed to determine whether there is an indication that the carrying

amount of an asset may be more than its recoverable amount and that the asset should be impaired. If there is an

indication of possible impairment, the recoverable amount of an asset, which is the higher of its value in use and

its net realisable value, is estimated and compared with its carrying amount. If the recoverable amount is lower,

the carrying amount of the asset is written down to its estimated recoverable amount and an impairment loss is

recognised in profit and loss.

3. EMPLOYEES AND DIRECTORS

The average number of employees during the year was 21 (2018 - 24).
